tial area is primarily on higher ground in the northern part of the city. The University of Malaya is located in Singapore, though plans are being made to move it to Johore Baru on the Malayan mainland. Being largely a Chinese city, Singapore has come to act as a center for the Nan Yang expatriate Chinese, and the city has been chosen as the site of a new Chinese-language regional university.[20] Nevertheless, its air is not that of a Chinese city, nor, for that matter, is it English. Like all great cities, it is cosmopolitan, but it is also culturally rootless, perhaps more so than any of the other great cities of the region.

At the other extreme is Bangkok, most indigenous of the great cities. Founded as the last of a series of "forward capitals"[21] by the Thai in 1783, after the destruction of Ayuthia by the Burmese, the city has never lost its native quality. The soaring rooftrees of *bot* and the spires of stupa stamp the Bangkok skyline with a character of its own. The city is located on the left bank of the Menam Chao Phya within the southernmost great bend of the river some twenty miles from its mouth. Exceptional problems of poor drainage plagued the city from the start, and its numerous *klongs* or canals have given it the rather misleading title of the "Venice of the East."

A Chinese city early appeared to the southeast of the original castle town and in time became part of the central business district. As the lesser *klongs* were filled in to become roads, the city continued to expand. A new city appeared on the northern outskirts of the old, a planned creation built in the reign of Rama VI with broad boulevards and buildings ranging from shocking Victorian variations on Italian Renaissance to more recent battleship modern. The contrast between the façade of modern buildings fronting these boulevards and the stilted, bamboo, thatch, and tin-roofed houses
